Ray ~~McKinnon~~ McKinnon:

I was sitting on the stoop at 237 Jellif about 1:00AM, talking with a friend. A car made a left off Clinton Ave and parked across the street from me and the driver got out and started running. A cop car was right behind and there was a shot while the cops were still in the car and it was still moving. The man fell and the cops jumped out and started searching him. There were other cops on the other end of the alley by the diner.

After they searched him they searched the car. I didn't see them take anything out of the car.

One cop acted like he was limping but it might have been something wrong with his leg.

Then they told us to
get off the streets and
I went upstairs and watched
out of the window. It was
15 and 20 minutes before an
ambulance came.
As they didn't give any
warning but just started
shooting.
