Recently FBI and Justice Department agents hidden out among a group of negative minded psychopaths have moved into NewArk, to try to destroy the Committee for Unified NewArk, and stop the movement of the Congress of African People. In the classic move to splinter the movement, they have set up here now exactly as they set up in Los Angeles before. A small counterorganizing group of "used to be" Kawaïda advocates, all with mysterious grievances against the organization and its designated leadership.

These are presences that Maulana Karenga spoke constantly against, tho it would seem, in the end, they were more dedicated to disruption than even he suspected. Which is the reason they were forced to leave Los Angeles. Imamu Sukumu in San Diego has also warned about the agent psychopath group, who come on like disgruntled advocates, but whose actual job is to splinter the larger organization, because it is growing too strong and too influential nationally.

At this point the counterorganizing has focused around two or three emotionally disturbed women, and a couple of "plants" (ie agents to provoke the psychopaths), who the agents are using as "advertisements for polygamy" the flesh blandishment for "recruitment", for strays, thereby trying to siphon off the Committee's energies.

The group is composed of psychopaths and agents. The agents "playing" the psychopaths like flutes. A love-hate relationship exists among the psychopaths, who are the classic "Destroyers" as the doctrine points out, because they can no longer stand the concept of organization or the discipline and selfsacrifice of actually being

organized, though at the same time, and this is critical, they might be obsessed with the idea that only they, because they were in Los Angeles sucking energy from Maulana Karenga, have the hole card on how to organize, and what an organization needs.

At this point the parasites feed on our warmth and energy, huddling at Soul Sessions, Karamus, and actually exist only as a shadow to reality. And this article is merely a notification to advocates and close friends of CFUN and CAP, just what is happening!

It is no coincidence that in every major movement in America, black people have been split into opposing factions, so that the basic message and dynamic of the main body is diluted and distorted. It happened to the muslims, panthers, republic of new africa, and young lords, it happened in Los Angeles to the us organization, but it will not happen in NewArk.

Already one of the psychopathic females who is ready to testify against Maulana Karenga in court has come to NewArk. And it is well known under what kind of frenzied duress some of the faces we now see around NewArk had to leave Los Angeles. The internal conflict and dissolution that whittled away at the leadership of the us organization will not be allowed to take hold here.

It is the duty of every true advocate of Kawaida, and Pan African Nationalism, to expose at once the murky, degenerate creeps who feel they have no allegiance to any community but their own sick desires. We have to isolate these degenerates and dry up their sinkhole.

Be wary of the constant complainer, especially against organization and leadership.

Be wary of the know it all, who is so weak that he can only talk organization but is opposed to being in one

Be wary of the flesh freaks who try to make adultery and reefers "part of the doctrine"

Be wary of those who sow the seed of division in the organization, and would put advocate against officer, or brothers against sisters.

Be wary of individuals who are telling you how much they know, and how much more they know than the officers and leadership of the organization. Find out what have they contributed to the black nation? Ask What Are They Doing???

Speak directly to brothers and sisters you think are cocking an ear to the agent-psychopath group, (usually flesh is the way to the weakest people), and pull their coat.

Report divisive moves and jive raps to designated officers.

In other words, as we move to become even more important to black people all over the world, Uncle Creep will send his "hitmen" and their psychopathic campfollowers to split us up and confuse us. But it wont happen in the New Ark.

IMAMU
